

Provides Versatile Filtration for Specific Mist, Smoke and Odor Removal

One of industry's chief responsibilities is to provide a working environment which is safe, clean and healthy. At Tobero it is our duty to help our customers fulfill that responsibility.

Our improved, modular line of bag type media filters offers a broad range of standard filtration elements. All are expertly designed to meet very specific mist, smoke, dust and odor collection requirements.

With modular media filters, air contaminants result from grinding, wet machining, rubber machining, die cast lubricants, toxic stainless weld fumes, soldering as well as plastic injection molding fumes and smoke are trapped and eliminated.

FC CARBON

Function- Second or third stage after filter removes odors, gases and vapors from solvents (gluing operations). Primary filter in light applications with prefilter.

Feature- Removable, refillable, filter hold filter or trays with activated carbon.

MODEL	NOMINAL CAPACITY (CMH)	WEIGHT (lbs)	DIMENSIONS(MM)
