

Electrically Heated Hoses (templine®)

Heated hoses with integrated temperature controller/limiter for application in industrial processes, automation & machine-building

Electrically heated hose for power supply / temperature control

Material

- outer casing made of mechanically resilient and abrasion resistant materials
- single/double/multiple pressure-reinforced medium hose made of PTFE, high resistance to chemicals
- thermal insulation: optional silicone foam or silicon-free textile cord

Applications

- maintaining and increasing temperatures for gases, granules and liquids of varying viscosity
- sugar coating, chocolate production, beverage industry, gas analysis, adhesive technology, bitumen, etc.

Available on request

- patented braided templine® or wrapped templine®-Basic version

Properties

- homogenous heat distribution
- crush-resistant and antistatic constructions on demand
- possible connection to external temperature controllers or PLC
- templine® version: patented braiding with embedded heating conductors
- fittings made of steel or stainless steel
- applications up to 500 bar and vacuum
- low demand for energy
- high power density
- good flexibility

Temperature Range

- single/double/multiple pressure-reinforced medium hoses made of PTFE up to +250°C (+482°F)
- metal hose up to +300°C (+572°F)
- other temperature profiles on demand

Electrically heated hose with integrated temperature switch

Material

- outer casing made of mechanically resilient and abrasion resistant materials
- single/double/multiple pressure-reinforced medium hose made of PTFE, high resistance to chemicals
- thermal insulation: optional silicone foam or silicon-free textile cord

Applications

- maintaining temperature / frost protection for gases, granules and liquids of varying viscosity

Available on request

- patented braided templine® or wrapped templine®-Basic version

Properties

- homogenous heat distribution
- crush-resistant and antistatic constructions on demand
- templine® version: patented braiding with embedded heating conductors
- fittings made of steel or stainless steel
- applications up to 500 bar and vacuum
- low demand for energy
- maintaining the temperature of the medium at +5°C
- up to 690W switching capacity
- good flexibility

Temperature Range

- single/double/multiple pressure-reinforced medium hoses made of PTFE up to +250°C (+482°F)
- other temperature profiles on demand

Insulated hose without electrical heating for simple temperature maintenance

Material

- outer casing made of mechanically resilient and abrasion resistant materials
- single/double/multiple pressure-reinforced medium hose made of PTFE, high resistance to chemicals
- thermal insulation: optional silicone foam or silicon-free textile cord

Applications

- sugar coating, chocolate production, beverage industry, gas analysis, adhesive technology, bitumen, etc.
- temperature maintenance of gases, granules and liquids of various viscosities

Available on request

- RFID labelling

Properties

- crush-resistant and antistatic constructions on demand
- fittings made of steel or stainless steel
- applications up to 500 bar and vacuum
- good flexibility

Temperature Range

- single/double/multiple pressure-reinforced medium hoses made of PTFE up to +250°C (+482°F)
- metal hose up to +300°C (+572°F)
- other temperature profiles on demand

Electrically Heated Hoses

templine®-A/-R/-B VARIO

Electrically heated hose with interchangeable internal hose

Material

- outer casing made of mechanically resilient and abrasion resistant materials
- single/double/multiple pressure-reinforced medium hose made of PTFE, high resistance to chemicals
- thermal insulation: optional silicone foam or silicon-free textile cord

Applications

- maintaining and increasing temperatures for gases, granules and liquids of varying viscosity
- sugar coating, chocolate production, beverage industry, gas analysis, adhesive technology, bitumen, etc.

Available on request

- patented braided templine® or wrapped templine®-Basic version

Properties

- homogenous heat distribution
- crush-resistant and antistatic constructions on demand
- possible connection to external temperature controllers or PLC
- templine® version: patented braiding with embedded heating conductors
- applications up to 500 bar and vacuum
- low demand for energy
- fittings made of steel, stainless steel or open hose ends
- interchangeable medium hose
- good flexibility

Temperature Range

- single/double/multiple pressure-reinforced medium hoses made of PTFE up to +250°C (+482°F)
- other temperature profiles on demand
